LA PASSIONE DI EVOLVERE

The name Stilo comes from the tool used by the Bronze Age to write, to imprint their first thoughts, their first ideas, their first concepts.

In time the word "stilo" evolved to "style", that is the way each person uses a stilo: your own style. And our style is that of making products that leave a mark, exactly like a stilo in our ancestors wax boards.

OUR PHILOSOPHY

Top functionality.
Everything a driver needs must be standard feature:
intercom, connections, earmuffs, drinking system, etc.

2000

- First helmet sold. Origin of the WRC, the world's first open-face helmet designed around the intercom

2004

- Debut in the World Rally Championship with Gilles Panizzi

2008

- Birth of the ST4: Stilo professional helmet for racing. The world's first FIA8860-2004 certified racing helmet with earmuffs and integrated drinking system

2009

- Stilo develops ST-30, the world's first intercom featuring 2 circuits, one in use and one for backup

2010

- Launch of the WRC DES, world's first FIA8860-2004 certified open-face helmet
- New operations office in a 2.000 sq.m area. Energetically self-sufficient, carbon neutral on the environment
- Launch of the ST30-DES, world's first rally intercom with Bluetooth technology for mobile telephones connection

2012

- Stilo into the Rally legend: eighth World Champion title won with Sébastien Loeb and Citroen
- Stilo wins the GP2 main series with Davide Valsecchi

1999

- Foundation

2003

- First company worldwide to create a Bluetooth intercom for motorbikes

2005

- First World Rally Championship victory with Sébastien Loeb

2009

- First World Touring Car Championship victory with Gabriele Tarquini

2011

- Stilo designs ST4 Zero and WRC Zero, world's lightest FIA 8860 certified helmets, both full face and open face
- Verbacom launch: the very first communication system for racing with Bluetooth technology for mobile phone connection

2013

- Stilo develops the world first rally intercom with digital noise cancellation that debuts with Volkswagen winning the World Rally Championship in Sébastien Ogier's Polo WRC

2014

- Birth of ST5, designed to be the benchmark in full face helmets
- DG30, DG10 the world's first rally intercoms with noise digital active cancellation
- 2nd WRC title won with Volkswagen and 10th in a row for Stilo

WRC DES RANGE

10 TIME
WORLD RALLY
CHAMPION

“ I have tested all brands of helmets and I found the Stilo products had the best quality of sound and were the most comfortable. The WRC's fixed boom offers safety and a microphone that does not move it is easier to use”

Sébastien Loeb

“ To me Stilo helmets are just the best, in terms of comfort and light weight, look and the quality of the radio system”

Sébastien Ogier

- The open-face helmet designed around the intercom
- Stilo audio quality and features
- Microphone boom and plug integrated
- A range with no equal in 4 different materials
- Adjustments: microphone position, peak, earmuffs pressure
- Optional set up: adjustable short visor
- WRC DES 8860 accessories included: 2 visors, visor fitting kit, helmet bag

TROPHY DES RANGE

STILO QUALITY AT THE BEST PRICE

“At the top level in Motorsport we have priorities. Safety. Quality. Comfort. The Stilo Zero 8860 is perfect in every area and is the only choice for me”

Kris Meeke

- Stilo exclusive MSF structure (Multi Sandwich Fibers) with Kevlar® reinforcements
- Plus: with adjustable earmuffs and WRC intercom
- Rally: with speakers and Trophy intercom
- Jet: ready for the intercom fitment
- Adjustment: peak
- Optional set up: adjustable short visor

“I drive with Stilo because it has the best sound quality between a driver and co-driver. It is comfortable to wear and meets all the requirements I look for in a rally helmet.”

Andreas Mikkelsen

ST4R RANGE

THE RALLY FULL-FACE

“ Since our first year in WRC (2008 JuniorWRC), we have been convinced that Stilo's equipment would be the best available in Rally competitions. The quality of the radio system and the comfort of the helmet, but also, the additional protection due to the shape of the microphone boom, made us feel always safe. Six years after our first Stilo helmet, we can now add a star on it: the World Rally Champions!”

Julien Ingrassia

- The only one with integrated plugs
- Stilo audio quality and features
- Drinking system connection port
- A range with no equal in 4 different materials
- Adjustments: microphone position, peak, earmuffs pressure
- Optional set up: Drinking system, (short) visors.
- ST4R ZERO8860 accessories included: 2 visors, visor screw kit, helmet bag

“ For me the Stilo helmet is the best because of its lightness and its comfort especially during the long stages of the Dakar rally. And also due to its sound quality”

Stéphane Peterhansel

For:

- WRC DES RANGE
- TROPHY DES RANGE
- ST4R RANGE

EARMUFFS

Certified for rally and racing use, they make the helmet perfectly soundproof. The pressure on the driver's head can be adjusted with special foam paddings of various thicknesses to be positioned with Velcro right behind the earmuffs. In the Rally version speakers are installed while in the Touring version they are removable and free from cables. Should you wish to hear more of the external sounds earmuffs can be replaced with dedicated earmuffs provided with the helmet.

ADJUSTABLE MICROPHONE

WRC DES is fitted with an easily adjustable microphone boom. All it takes is to remove the boom padding and to use the provided spacers to move the microphone 5, 10 or 15 mm closer to the mouth.

Dedicated spacers to adjust the position with respect to the driver's mouth come as standard equipment.

MICROPHONE HOLDER

Fixed in the helmet interior and realized with a special flex pipe able to grant maximum stability and precise adjustment.

DG-30

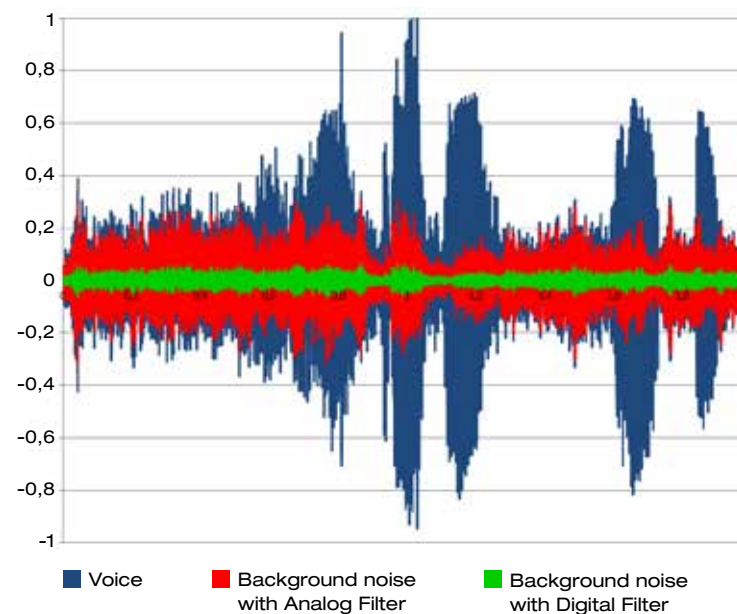

Main unit
with GSM
module integrated

Remote control panel

DIGITAL ACTIVE NOISE CANCELLATION

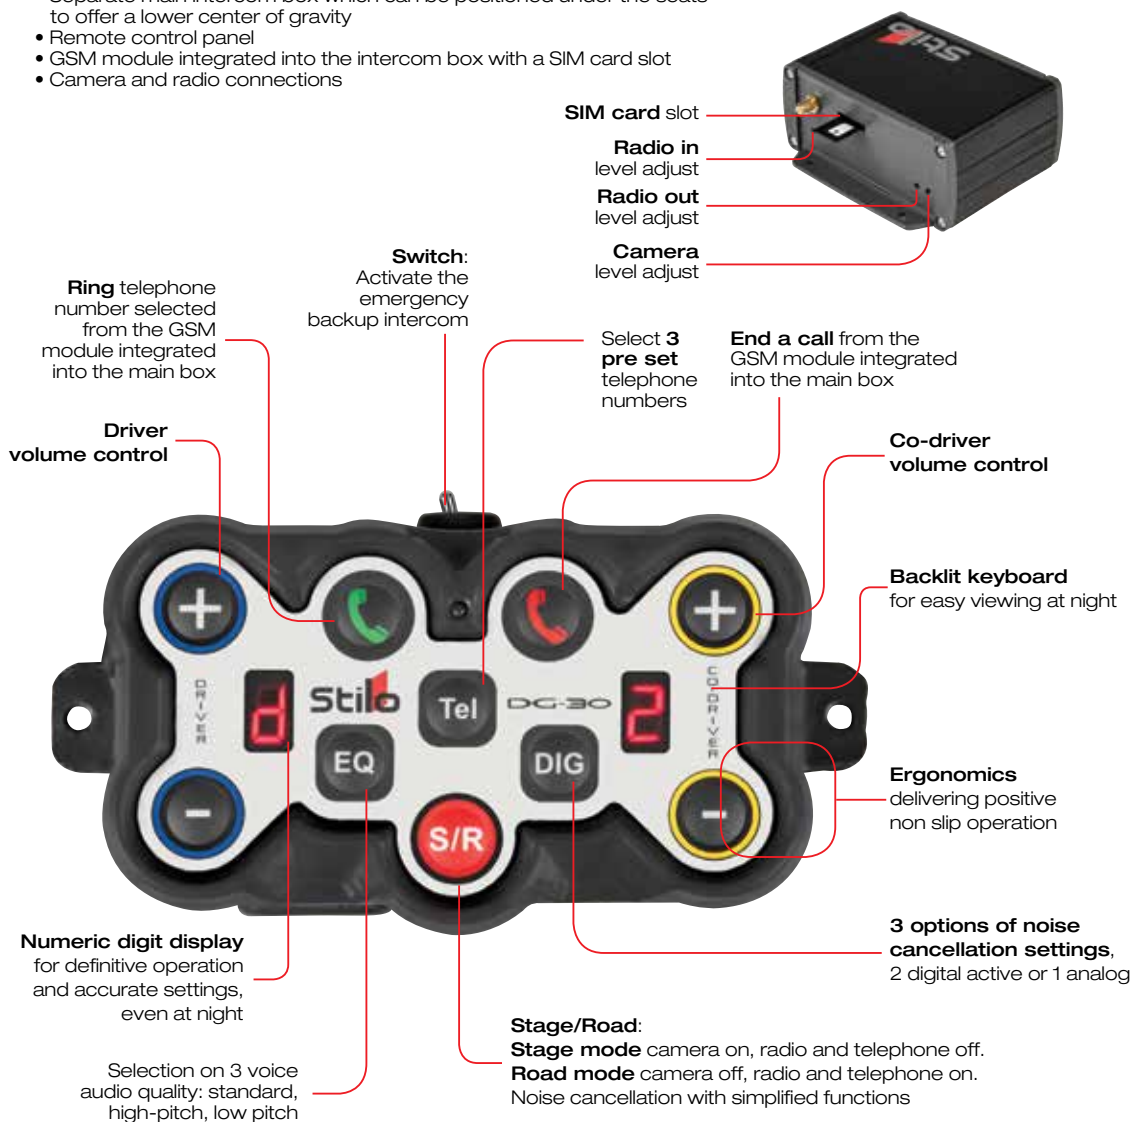

Why Digital? The next generation of Stilo digital intercoms offers a dramatic step forward with its active digital noise cancelling. Digital, unlike the limited capabilities of old analog intercoms, has the capability of active digital noise cancelling, which in a millisecond can separate the vitally important sound of the drivers voices from the excessive bad noises of the engine, transmissions and road surface and filter these right down while improving the more important sound of the communications between driver and co-driver. A whole new world in rally sport communications is now available from Stilo.

DG-30

THE STILO DIGITAL INTERCOM THAT HAS WON THE LAST 2 WORLD RALLY CHAMPIONSHIPS WITH VOLKSWAGEN

- Digital active noise cancellation with SDA filter
- Separate main intercom box which can be positioned under the seats to offer a lower center of gravity
- Remote control panel
- GSM module integrated into the intercom box with a SIM card slot
- Camera and radio connections

DG-10

DEVELOPED DIRECTLY FROM DG30: SAME DIGITAL ACTIVE NOISE CANCELLATION WITH SIMPLIFIED FUNCTIONS

- Digital active noise cancellation with SDA filter
- Integrated Bluetooth for mobile phone connection
- Camera and radio connections

WRC DES 9V

The best of Stilo's analogic noise cancellation available thanks to the "Extra Filter". Fed from the car power supply and 9V battery. Bluetooth connection with mobile telephones not available.

- The best analogic Stilo audio quality and the maximum ease of use at a price with no equal
- Camera or Radio connection
- Powered by a 9 volt battery or fed from the car power supply.

▷ **AB0214** WRC DES 9V

Extra Filter even more effective. Moving the switch to "Extra Filter" the background noises are strongly damped and the co-driver voice's louder to the driver. Since the driver's voice sounds lower to the co-driver, it is recommended that the Extra Filter is set to off during transfers

Plug

Camera out (low or high level) or radio IN switch

▷ **YB0312** Wirings to connect cameras

Camera/Radio connection

WRC 03

Specifically designed for roll-bars fitment. ON/OFF control with the co-driver plug-in (never to forget to switch the intercom off); separated volumes, 9 V standard power supply and 12 V available option. Stilo specific cables for fastening safety belts. Camera connection.

▷ **AB0200** WRC 03

Camera connection

Plug

YB0100

TROPHY 2

- Individual volume controls
- 9 Volt battery or 12 Volt optional adapter; wirings
- Camera connection
- ON/OFF Led
- High quality metal jacks
- Special design for roll-bar fitting.

▷ **AB0102** TROPHY 2

Camera connection

“ I chose to have Stilo for the best safety, light weight, good sound and one of the most important, the comfort of the helmet. It's very comfortable. If you want to be on the top, all details are important. And helmet is for sure one important detail”

Mads Østberg

“ I choose Stilo WRC helmet for its stylish design but more so it has excellent quality in sound and very comfortable”

Dani Sordo

“ I choose the Stilo WRC because it is very comfortable and the sound quality is excellent”

Carlos Sainz

“ Of course safety is a very important feature of a helmet, but in the Cross Country Sport also other characteristics are important. Our helmets have to be comfortable and have to fit perfectly. We wear them up to six hours per day or longer in really hard conditions like dust, sand and heat. The Stilo helmet fulfills all this requirements without any doubt”

OPEN FACE RANGE

THE OPEN-FACE FOR RACING

“The helmet is very personal and also bound to a romantic aspect. It is essential to keep the minimum weight with any component, I have found also a very very light helmet.. I am really happy because I wear the safest and lightest helmet on the market.”

Jaime Alguersuari

“I'm very happy to work with Stilo. Their products are really useful for me. You can tell that Stilo took in consideration the needs of drivers, starting from the radio and drink system that can be integrated into the helmet to ear protections that reduce quite a lot all kind of sounds inside the car. I had a look to their new model “Zero” and I can't wait to use it on track”

Edoardo Mortara

ST5 - ST4 ACCESSORIES

FORMULA AIR FLOW

GT AIR FLOW

CUFF

45° cuff for Ø 1.5 inches to helmet top air oval hose.

▷ **YA0714**

For:
• YA0715
• YA0716
• YA0700
• YA0701

TOP AIR SYSTEM KIT

The exclusive Stilo "Top Air System" takes fresh air to the driver's head and nose. With the innovative system for the air flow regulation you can favor the air flow on the driver's face for a better breathing or for cooling the driver's head. The Top Air System can be fitted onto ST4 Formula and GT models. Thanks to the fixation system you can fit it more than once replacing the dedicated fixation tape.

▷ **YA0715**

For:
• ST5F RANGE
• ST5W RANGE

Without flow adjuster.

▷ **YA0716**

For:
• ST5F RANGE
• ST5W RANGE

SIDE AIR SYSTEM

The driver can breathe fresh air when driving in close cockpit cars. The air coupling for the helmet is made for tubes of a 20mm Ø. Couplings are available for tubes with a different diameter, up to 32mm.

▷ **YA0653**
▷ **YA0639**

For:
• ST5F RANGE
• ST5W RANGE
• ST4F RANGE
• ST4W RANGE

ST5 / ST4 ACCESSORIES

Preparation for frontal drinking system

Internal chin pad

Silicone rubber bite valve with anti-backflow system

DRINKING SYSTEM

ST4 and ST5 are homologated with a drinking system integrated.

- ▷ **YA0600** Inner side of the helmet YA0601 + YA0602 + YA0603
- ▷ **YA0601** Bite valve in silicon rubber with anti-backflow system
- ▷ **YA0602** Water tube
- ▷ **YA0603** Male quick coupling
- ▷ **YA0604** Female quick coupling
- ▷ **YA0605** Hydration bag + tube + YA0604

For:

- ST5F RANGE
- ST5W RANGE
- ST4F RANGE
- ST4W RANGE

QUICK COUPLING

Quick coupling for drinking system with anti-backflow valve. The coupling assembly is designed to allow the driver a quick evacuation. In case of emergency indeed, by just a slight tug, the coupling slips off releasing the driver.

SPARE REMOVABLE EARMUFFS

ST5 is homologated FIA 8860-2010 with integrated earmuffs that offer excellent insulation from external noise and are certified for use in racing. They are not fitted with speakers which are not permitted on track: communication is always carried out through earplugs (optional, AE0300). The pressure on the driver's head can be adjusted with the special spare foam rubber paddings of various thicknesses to be positioned with velcro. Should you wish a lower sound insulation, earmuffs can be replaced with dedicated earcushions provided with the helmet. (YA0016)

▷ YA0002

For:

“I have tested all brands of helmets and I found the Stilo products had the best quality of sound and were the most comfortable”

Sébastien Loeb

“I chose Stilo because of its way of facing things, very close to mine. A helmet with a nice design and yet aggressive, reminding the mythical American helmets of the 80s, truly Italian like me”

Gabriele Tarquini

“I choose Stilo for all the combinations... Is the lightest helmet I have ever use, fits and feels very comfortable and with his integrated radio system makes much better the communication with the team and last longer”

José Maria López

“I have been in the Stilo family for a few years now, and it has been an amazing experience at all levels. I have an amazing product, the safest on the market, the lightest and the best looking as well! But also I found a new family of supporting people and friends that answer my needs and support me every time I need it!”

Tiago Monteiro

“In the Motorsport world, the search for the limit and quality are fundamental for performance, Stilo managed to merge all the best that a helmet can give in one product. I am proud of wearing such a high level Italian helmet racing all over the world”

Augusto Farfus

“I am very happy with my Stilo helmet as it is light, comfortable and with the great isolation from the noise enables an easy communication with the Team also thanks to the protection for the ears inside the helmet. Very clever, I like it a lot!”

Olivier Beretta

“The helmet is everything to drivers. With Stilo I found good comfort and excellent sound insulation. Thanks to a professional Team, anything I require is satisfied”

Gianmaria Bruni

“Anytime I wear it, I enjoy feeling the lightness and comfort on my head”

Davide Rigon

“Functionality, lightness and comfort, Stilo perfectly combines all these values. In our world the helmet plays a key role and Stilo provides us with a product that reflects our tastes and our needs”

Giancarlo Fisichella

“I've been using Stilo for many years now. The latest “Zero” model offers the best comfort, audio, safety and weight. Relevant also is the service, we race all around the world and we always find Stilo's assistance. Stilo embodies all values that a professional requires”

Toni Vilander

“It's very light and very comfortable. Stilo provided me with a custom fitting that fits my head perfectly. Very recommended and very good looking”

James Calado

“ Since 2010, I have been using a Stilo helmet, whether driving a prototype in endurance, GT or rallying. These helmets combine lightweight performance with comfort, which isn't always the case. A primary example is how the positioning fits me well. I also like the opening of the visor, which varies depending on the model or make. In an open cockpit car, the aerodynamics also play an important role and the Stilo helmet that I use has always been up to the task. I've worn Stilo helmets while driving in all types of conditions and all types of cars. Each time, I have been satisfied”

Romain Dumas

Photo:
Toyota Racing

“ In my view, Stilo can be summed up in 2 words: Design and Technologie. I have come to be a real fan of the brand! These helmets have a stunning design and from the usage side, even at professional level, everything is beyond reproach: comfort, perfect maintenance, light-weight, strength... I really feel safe even at a 340Km/h speed! Stilo is the best of the best!”

Stephane Sarrazin

Toyota Racing

VERBACOM PRO

Car equipment

- The main GSM unit (1) can be installed anywhere in the car and powered directly from the car battery (110 gr 80 x 60 x 30 mm). The main GSM unit also features an internal battery that ensures 1h communication when the car is switched off and starts recharging automatically when the car is switched on.
- The external aerial (2) ensures maximum reception.
- Professional wiring (3) for connection to the helmet.
- The keyboard (4) controls volume. The switch (5) turns the system ON and OFF.

VERBACOM CLUB

Car equipment

Working in the same way as the Verbacom Pro, the club unit is totally transportable for use in any vehicle or kart. The main Bluetooth unit (1) is self-powered and connects to a mobile phone (4) (Sim card not supplied) which is mounted in the car. This unit has volume controls and a visible system status light for the driver, and also an on/off switch. This weighing just 66gr and measuring 74 x 47 x 15 mm it is extremely small and light. Helmet wiring (3) with an extension cable connects into the driver's helmet (AE0300 and AE0315 are required should your helmet have no wiring).

The first car to pit communication system using mobile phones

Advantages

- **Licenses:** there is no need for a license as it uses mobile telephone Sim cards.
- **Full Duplex:** while also totally private and secure, the both phones allow each of the crew to talk at the same time.
- **Coverage:** unlike temperamental radio systems, the Verbacom allows communication on any length of circuit as it uses mobile phone signals.
- **Clarity:** using digital noise cancelling the communications give excellent voice clarity, which has been tested in F3 to F1 cars, and GT to Le Mans vehicles.
- **Easy to Use:** this unit has been designed around professional motorsport, and is extremely easy to use and setup. Simple and very very effective.
- **In Car:** the driver does no more than plug in and drive. Thanks to the digital noise cancellation that cancels all background noises, there's no need to use a PTT button and the driver can speak anytime.
- **Lightweight and Compact:** the Verbacom is very lightweight in comparison to normal radio systems giving performance all round.

- **Verbacom PRO available versions:**
 - CQ005: Single Car to Single Pit Headset
 - CQ006: Single Car to Two Pit Headsets
 - CQ007: Two Cars to a Single Pit Headset
- **Verbacom CLUB available versions:**
 - CQ001 - Single Car to Single Pit Headset
 - CQ002 - Single Car to Two Pit Headsets
 - CQ003 - Two Cars to a Single Pit Headset.

How it works

Verbacom offers drivers a cost effective and very efficient car to pit communication system by using mobile phones. The Pit wall phone calls the car phone before the car starts, the car unit is programmed to automatically answer and the phone call is kept open keeping the car and Pit unit continually connected until switched off. The communication between units is always open, the pit crew press the push to talk button on the headset to transmit to the driver, whilst the driver can simply speak without pressing any button thanks to the digital noise cancellation that cancels all background noises.. If for any reason the signal is lost and call is dropped? The pit phone automatically calls the car which answers it for the driver. It is as easy as that.

Pit equipment

- Noise reduction headsets are self powered and have either a single or double Bluetooth unit subject to the system you buy. These connect to a mobile phone (2) by Bluetooth for communication with the car, or wirelessly to the second pit headset (1).

ELECTRONIC ACCESSORIES

EARPLUGS FULL-FACE KIT

The full-face kit consists of two parts. The first (p.n. AE0315) is to be fitted into the helmet and is composed of: magnetic-dynamic noise cancelling microphone, connection jack for earplugs and connection jack for car radio systems (CG0007). The second part is the earplugs kit (AE0300), a set of miniature earphones with noise attenuating plugs and a miniaturised professional jack with quick release connection. It comes in a practical case.

“Stilo is a perfect example that describes the Italian excellence. The continual technical development and the obsessive care for details led to the Top helmet in both rallies and circuit”

Marco Bonanomi

“It is incredible how light the carbon Zero helmet is and as a driver you really notice the benefit over long stints”

Oliver Jarvis

“Stilo renovated and came with a lot of new ideas on its helmets, such as space for the drinking system and the radio and pads for the ear, personally I'm a big fan of the pads because allow me to be more focused because the car noise is much lower. The other fantastic characteristic in Stilo is that they take care of the drivers, with personalized helmets and very professional work”

Filipe Albuquerque

ACCESSORIES

HANS XLT
